Carpinteria Valley Water District (CVWD) has compiled a list of state-approved certified backflow assembly testers that have registered with us and are authorized to perform work within our jurisdiction.

This list is not necessarily up to date and CVWD does not recommend, endorse, or warrant the work of any individual or company listed. Please also note that not all testers are insured. The information listed may have changed; it is your responsibility as the customer to verify that the tester has a valid certification at the time of testing. Testers will not be able to submit tests to

<https://www.carpinteria.tokaytest.com> if we do not have a valid state-approved certification and valid test kit calibration report on file.
