Injection and Monitoring Wells

REVISIONS

Revision No. 1: The blank casing thickness has been increased from 0.25-inch to 0.3125-inch and screen rod diameter has been increased from 0.25-inch to 0.295-inch.

Part B, Section 106 – Overview of Work to be Done: table at bottom of page 197 / top of page 198 is revised as follows:

Interval (depth in ft below ground surface)	Material
0 to 280	14-inch-outside diameter, 5/16-inch wall thickness, TYPE 304 STAINLESS STEEL blank casing
280 to 340	14-inch-outside diameter, TYPE 304 STAINLESS STEEL wire-wrapped well screen, with 0.050-inch slots
340 to 930	14-inch-outside diameter, 5/16-inch wall thickness, TYPE 304 STAINLESS STEEL blank casing
930 to 990	14-inch-outside diameter, TYPE 304 STAINLESS STEEL wire-wrapped well screen, with 0.050-inch slots
990 to 1100	14-inch-outside diameter, 5/16-inch wall thickness, TYPE 304 STAINLESS STEEL blank casing
1100 to 1200	14-inch-outside diameter, TYPE 304 STAINLESS STEEL wire-wrapped well screen, with 0.050-inch slots
1200 to 1220	14-inch-outside diameter, 5/16-inch wall thickness, TYPE 304 STAINLESS STEEL blank cellar with bullnose

Part B, Section 208 – Well Casings and Screens, Materials: page 216, 2nd, 3rd and 4th paragraphs are revised as follows:

14-Inch-Outside-Diameter Stainless Steel Blank Well Casing. The 14-inch-diameter blank casing shall be of TYPE 304 stainless steel construction, in accordance with ASTM A-312 or A-778, with minimum 0.3125-inch (5/16-inch) wall thickness.

14-Inch-Outside-Diameter Stainless Steel Wire Wrapped Well Screen. Well screen shall be 14-inch-nominal-diameter stainless steel, TYPE 304 with a slot size of 0.050-inch. The well screen shall be of the continuous slot, welded, wire-wrapped design, and of construction to provide sufficient tensile and collapse strength. Vertical rods shall be 0.295-inch diameter and consist of 64 rods circumferentially (minimum). For the No. 50 slot screen (0.050-inch), the minimum open area requirement is 137 square inches per linear foot. The tolerance for the final slot size selected shall be ± 0.005 inches. It is the Contractor's sole responsibility to ensure the well screen has sufficient tensile and collapse strength to be assembled, landed, and installed without damage to casing, screen, or borehole.

14-Inch-Outside-Diameter Stainless Steel Cellar Pipe and Cap. The stainless steel cellar pipe shall be 14-inch-diameter in size and 20 feet in length, and manufactured of TYPE 304 stainless steel pipe in accordance with ASTM standard A-312 or A-778. The wall thickness shall be minimum 0.3125-inches (5/16-inches). The bottom of the well casing shall be fitted with a bullnose plug welded in place.

Revision No. 2: Backfilling of soundwall post holes in the paved and unpaved areas are specified.

Part B, Section 202 – Noise Control, Placement: page 207, after 1st paragraph insert the following paragraphs:

In order to prevent settling of soundwall postholes after backfilling, soundwall posts within the paved area of the Meadow View site shall be installed and removed according to the following procedure or alternate as approved by the OTR: Contractor shall limit the breaking of pavement to the immediate vicinity of posthole installation. It is expected that breakage should be limited to a 3-foot diameter circle centered on each posthole location. Excess soil excavated from soundwall post holes shall be removed from the site and disposed of in the manner described for drilling cuttings in Section 219. Soundwall poles shall be secured in place using gravel of a type that will provide adequate compaction in the posthole upon removal of the post. After removal of each soundwall post, Contractor shall fill the remaining cavity with 4-sack cement-sand slurry to a height of 2" below the top of pavement, with remainder filled with cold-patch asphalt tamped level with the top of pavement.

For soundwall postholes located in unpaved areas at the Linden and Ag Parcel sites, Contractor shall backfill with native soil and compact by injecting water into the backfilled soil to the full depth of the posthole until the hole is full of water to ground level. After complete absorption of injected water, the remaining cavity shall be "topped off" with native soil and compacted by injection of water into the added soil.

Revision No. 3: Davis Bacon Federal Wage Rates have been updated.

Part A, Federal Wage Rate: replace pages 103 through 135 with the attached.

Revision No. 4: The bid price for Monitoring Well Mobilization shall not exceed 10% of the total bid amount for monitoring wells.

Part B, Section 301 – Mobilization, Payment: page 241, at the end of 3rd paragraph insert the following text:

The bid price for mobilization shall not exceed 10% of the total bid amount

CLARIFICATIONS

Clarification No. 1:

- **Question:** Can the AG Parcel MW Cluster start in October, if we start the injection well at Linden at the same time?
- **Answer:** No. Due to site access agreements, the Ag Parcel MW Cluster must be drilled after the Linden IW, Linden MW and Meadow View IW have been completed.

Clarification No. 2:

- **Question:** Is a project sign required? If so, how many project signs are required?
- **Answer:** Yes. Technically only one sign is required. The sign requirements are outlined in Article 5 of the Funding Agreement Conditions.

Clarification No. 3:

- **Question:** Please confirm CVWD will trim back trees at the Ag Parcel to allow sound wall install.
- **Answer:** Confirmed.

Clarification No. 4:

- **Question:** Is the mobilization limited to 10% on the injection wells only or both injection and monitoring wells.
- **Answer:** The 10% mobilization limit applies to both injection and monitoring wells total bid prices. See above Revision No. 4

Clarification No. 5:

- **Question:** Is the mobilization multiplied twice on the bid sheet?
- **Answer:** Yes.

Clarification No. 6:

- **Question:** What is the timeframe for the well design after borehole logging?
- **Answer:** The final well design will be provided within 24 hours of completion of the geophysical log.

Clarification No. 7:

- **Question:** Meadow View Site: How should soundwall holes be backfilled. Temp AC with cold patch or hot patch? Does it require soils test?
- **Answer:** Refer to above Revision No. 2. Soils testing is not required.

Clarification No. 8:

- **Question:** Linden Location Discharge: Discharge at job walk appears to be in the driveway to the church. Is the contractor expected to use that location as point of discharge? Will the city/church accept an above ground line that prevents use of the driveway?

ADDENDUM NO.2
Carpinteria Valley Water District
CAPP Injection and Monitoring Wells **DRAFT**

- **Answer:** As discussed at the Pre-Bid Meeting, there is an existing storm drain drop inlet on the north side of the church driveway that was covered by the pipeline contractor doing work at the site when the meeting was held. We have been informed that the drop inlet was temporarily covered with plywood and then native soil, but that it will be uncovered prior to mobilization. For reference, below is a photograph of the drop inlet discharge location prior to being covered.

=====

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Note: Executive Order 13658 generally applies to contracts subject to the Davis-Bacon Act that were awarded on or between January 1, 2015 and January 29, 2022, and that have not been renewed or extended on or after January 30, 2022. Executive Order 13658 does not apply to contracts subject only to the Davis-Bacon Related Acts regardless of when they were awarded. If a contract is subject to Executive Order 13658, the contractor must pay all covered workers at least \$13.65 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract from May 11, 2026, through December 31, 2026. The applicable Executive Order minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under Executive Order 13658 is available at www.dol.gov/whd/govcontracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

The body of each wage determination lists the classifications and wage rates that have been found to be prevailing for the type(s) of construction and geographic area covered by the wage determination. The classifications are listed in alphabetical order under rate identifiers indicating whether the particular rate is a union rate (current union negotiated rate), a survey rate, a weighted union average rate, a state adopted rate, or a supplemental classification rate.

Union Rate Identifiers

A four-letter identifier beginning with characters other than SU, UAVG, SA, or SC denotes that a union rate was prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2024. PLUM is an identifier of the union whose collectively bargained rate prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. The date, 07/01/2024 in the example, is the effective date of the most current negotiated rate.

Union prevailing wage rates are updated to reflect all changes over time that are reported to WHD in the rates

in the collective bargaining agreement (CBA) governing the classification.

Union Average Rate Identifiers

The UAVG identifier indicates that no single rate prevailed for those classifications, but that 100% of the data reported for the classifications reflected union rates. EXAMPLE:

UAVG-OH-0010 01/01/2024. UAVG indicates that the rate is a weighted union average rate. OH indicates the State of Ohio. The next number, 0010 in the example, is an internal number used in producing the wage determination. The date, 01/01/2024 in the example, indicates the date the wage determination was updated to reflect the most current union average rate.

A UAVG rate will be updated once a year, usually in January, to reflect a weighted average of the current rates in the collective bargaining agreements on which the rate is based.

Survey Rate Identifiers

The SU identifier indicates that either a single non-union rate prevailed (as defined in 29 CFR 1.2) for this classification in the survey or that the rate was derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As a weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SUFL2022-007 6/27/2024. SU indicates the rate is a single non-union prevailing rate or a weighted average of survey data for that classification. FL indicates the State of Florida. 2022 is the year of the survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 6/27/2024 in the example, indicates the survey completion date for the classifications and rates under that identifier.

SU wage rates typically remain in effect until a new survey is conducted. However, the Wage and Hour Division (WHD) has the discretion to update such rates under 29 CFR 1.6(c)(1).

State Adopted Rate Identifiers

The SA identifier indicates that the classifications and prevailing wage rates set by a state (or local) government were adopted under 29 C.F.R 1.3(g)-(h). Example: SAME2023-007 01/03/2024. SA reflects that the rates are state adopted. ME refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. The date, 01/03/2024 in the example, reflects the date on which the classifications and rates under the SA identifier took effect under state law in the state from which the rates were adopted.

WAGE DETERMINATION APPEALS PROCESS

1) Has there been an initial decision in the matter? This can be:

- a) a survey underlying a wage determination
- b) an existing published wage determination
- c) an initial WHD letter setting forth a position on a wage determination matter
- d) an initial conformance (additional classification and rate) determination

On survey related matters, initial contact, including requests for summaries of surveys, should be directed to the WHD Branch of Wage Surveys. Requests can be submitted via email to davisbaconinfo@dol.gov or by mail to:

Branch of Wage Surveys
Wage and Hour Division

U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

Regarding any other wage determination matter such as conformance decisions, requests for initial decisions should be directed to the WHD Branch of Construction Wage Determinations. Requests can be submitted via email to BCWD-Office@dol.gov or by mail to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2) If an initial decision has been issued, then any interested party (those affected by the action) that disagrees with the decision can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Requests for review and reconsideration can be submitted via email to dba.reconsideration@dol.gov or by mail to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210.
